EXPERIENCE

NASHVILLE SOFTWARE SCHOOL

Teaching Assistant - Nashville Software School (present)
Web Development Jumpstart Program - An intro to HTML, CSS and JavaScript

Apprentice Software Developer
C# .NET & Angular Cohort
An intensive 12-month software development bootcamp enriched in hands-on application of OOP fundamentals through group and individual projects. NSS focuses on industry best practices and the sharpening of skills to apply new learned technologies and resources.

- Experience with: C#, ASP.NET, MVC, SQL, Angular, JavaScript, HTML5, CSS3. SASS
- Leveraged VMware for partitioning in Mac and Windows environments to utilize Visual Studio 2015 IDE
- Solution design: white boarding and wireframes
- Leveraged Razor for MVC apps; testing with Moq
- Experience presenting projects in front of peers
- Source code/version control through the use of GitHub

PROJECTS

"MyPod" - Podcast Player & Blog App
An ASP.NET WebAPI app designed for users to play and discuss their favorite podcasts. Users can listen to episodes and store their favorite podcasts and blog about what they heard. Technologies used: ASP.NET(C#) MVC & WebAPI, AngularJS and Bootstrap
